

# CONNECTING FARMERS & CONTRACTORS WITH INNOVATION & EXCELLENCE

Your regular update from the team at EuroAgri • March 2016

## EUROAGRI WOULD LIKE TO INTRODUCE MATTHEW KAPPELLE & PHILIP SMART

Matthew comes to Euro Agri with a background in the Arable sector and a passion for machinery and being an Ashburton local knows and understands the unique challenges farmers face in this area. He is also a strong believer in selling the right product for the job and backing up that product with strong after sales service and support.

With a solid background in Arable farming and Agricultural contracting, he is well placed to serve his client's needs with sound advice and knowledge, based on practical experience of working extensively with a wide array of machinery.

Matthew currently lives in Rakaia and enjoys hunting and exploring the high country in his spare time.

Philip has been working in the farm machinery industry since 1997, including time as a service technician and as parts manager before 15 years in a sales role. Prior to farm machinery Philip was involved in a mixed arable farm in Marlborough and working on an arable farm in the UK.

Darfield is now home where he lives with his wife and son. Outside of work Philip enjoys life on his lifestyle block, other interests are camping and tramping, his Morris 8 car and golf. Philip is also involved in his family's horse riding interests.

Philip enjoys helping customers find the right machine for their needs and is excited to be out in the Selwyn and the North Canterbury districts.

### OUT AND ABOUT

29  
JAN

Loaded up and ready for some He-va cultivation demos.

29  
JAN

He-va 5m Disc Roller and Combi Tiller demo at Sheffield. Working a clover paddock with a few stones on top.

10  
FEB

EuroAgri at the Southern Field Days

## STRIP-TILL DRILLING PROVIDES AN OPTIMUM ENVIRONMENT FOR STRONG, EVEN CROP ESTABLISHMENT

**WIDELY RECOGNISED AS EUROPE'S PRINCIPAL ONE PASS STRIP TILLAGE SYSTEM;  
UNRIVALLED IN CULTIVATION, RECONSOLIDATION AND SEED PLACEMENT ACCURACY**

### **ZONE A – CULTIVATION**

The serrated disc cuts through the surface straw allowing the residue to flow freely to either side of the tilled strip. The auto-reset tine coupled with replacement point and wing cultivate the seeding zone to ensure a clean strip of moist, friable soil free from surface residue. Band placement of fertilizer below the seed reduces the fertilizer requirement and ensures early nutrient accessibility, providing essential support for quick, strong and healthy establishment.

### **ZONE B – RECONSOLIDATION**

A key feature with the Mzuri's unique design is the fact that all of the machine's weight is evenly spread across all of the cultivated strips, fundamental in reconsolidating the tilled strip to remove air pockets, widely recognised as very necessary to ensure quick, healthy root development.

### **ZONE C – SEEDING**

The coulter tool bar works totally independently to the cultivation zone, ensuring easy adjustment and constant seed depth control. Each coulter hydraulically exerts pressure to each of the seed depth wheels to ensure accurate seed placement and excellent soil to seed contact, to ensure the quickest and even germination.

## INDENT SPECIAL

### SABRE DISCS & COMBI TILLER POINTS

**Sabre Disc, less 20%** (Minimum order qty 16) normally \$104.48, special indent price \$83.58<sup>+GST\*</sup>.

\*Terms and conditions apply. Offer ending 31/03/2016.

### A WORD FROM THE PARTS DEPARTMENT

"With Autumn in full swing, do not forget we have a wide variety of parts on hand."

- Phil Webb

## TRADE SHOWS

EuroAgri have the Mayfield and Methevn A&P Shows coming up in March. They are both a good opportunity for EuroAgri to spend time in their local area. Keep 12th & 19th March free to attend EuroAgri's local A&P Shows. We encourage everyone to call in, even if it is only for a friendly chat with one of the sales team.

EuroAgri's newest sales consultant, Matthew Kappelle will be on-site for people to put a face to the name. Matthew is looking forward to getting out and about in the community talking to EuroAgri's clients.

**SEE YOU AT THE MAYFIELD A&P SHOW**  
**12 March 2016**

**Service:** 021 743 911

**Parts:** 027 3077 445

**Sales (James McCloy):** 027 782 7606
